

Wall groove clamp clip

The wall groove clamp clip from OBO is a clever problem-solver on any building site: It not only covers a wide range of slot widths (from <27 mm to >45 mm) and can be fastened on many types of substrate – such as concrete or calcareous limestone – but also stands out through its integrated locking system. This means that it can be fastened

without nails. In narrow slots, the clamp clips itself in the milled slot with the necessary pressure. A perfect hold – guaranteed. Poor substrate quality? A hole in the centre always offers the additional function of knocking a nail in.

Wall groove clamp clip for toolless fixing of cables and pipes in wall slots of between 27 mm and 45 mm width.

Nail-Fix with steel nail

The Nail-Fix clip for wall groove slots from the OBO portfolio allows the fastening of cables and pipes on the straight side in a way that is simpler than ever before. Nail-Fix covers slot widths of 25 mm to 46 mm and can be fastened to many different

substrates, such as concrete, Y-Tong, calcareous limestone or porous concrete. This means that the clever clip is the ideal solution for many different installation situations. It can be fastened without having to hit a nail with a hammer.

Nail-Fix nail clip with pre-mounted galvanised steel nail, to fix cables in wall slots of between 25 mm and 46 mm width and on masonry.
