

UDHOME floor boxes and floor sockets

Perfect supply of power and data

Elegant, discreet, sturdy

The UDHOME product range carries power, data and multimedia technology exactly to where they are needed. The floor sockets and floor boxes are mounted directly onto the raw floor and connected to flexible installation pipes. They blend seamlessly into the interior design thanks to their elegant and discreet appearance. When the hinged cover is closed, only the high-quality surfaces made from pure stain-

less steel or solid brass are visible. However, floor coverings made of stone, tiles, plastic material or wood can also be easily incorporated into the system's cover. Thanks to their solid construction, they are also resistant to the daily loads in living spaces and office areas or in administrative buildings.

Benefits of the UDHOME product range

- Single outlet solution for many applications, both ready – and easy – to install
- Maximum flexibility when mounting and equipping
- Adjustable: The cover can be inserted by the user in any direction so that the cord outlet always points in the desired direction
- With tube cover also suitable for wet-cleaning
- Always an exact joint with the floor covering
- High-quality materials and sturdy finish
- Manufactured using energy from renewable sources

An overview of the UDHOME series

Floor boxes

For a wide variety of equipment and for dry-cleaned floor coverings the UDHOME4 and UDHOME9 floor boxes are the ideal solution. You can find further information in our catalogue "Floor installation systems and under-floor systems".

UDHOME4: suitable for 4 standard devices or 6 OBO Modul 45 devices
UDHOME9: suitable for 9 standard devices or 12 OBO Modul 45 devices

Floor sockets

The two small floor sockets UDHOME-ONE and UDHOME2 combine a maximum of functionality with an elegant look with small dimensions of 140 x 140 mm. They are suitable for both dry- and wet-cleaned floors. You can find further information also in our catalogue "Floor installation systems and underfloor systems".

UDHOME ONE: suitable for 1 Modul 45 device + 1 data connection
UDHOME2: suitable for 2 Modul 45 devices + 2 data connections

Flexibility that is happy to be noticed

There are many things that you can only find at OBO because we work continuously to add to our range – or simply improve existing products even more. OBO Bettermann is the only manufacturer on the market to offer ready-to-install designer finishes for floor sockets.

With six stylish designs to choose from in high-quality finishes, you can match electrical installations even more harmoniously to the existing floor covering and to the individual design of the room. Even at a later stage! And things won't just look better: The new finishes underline, once again, the flexibility of the UDHOME product range – the covers of the floor sockets UDHOME2 and UDHOME-One can be swapped around at any time.

The new UDHOME designer finishes

Finish	Item number	Type	Design	Suitable for*
	7368221	UDHOME-ONE GV D1	Angelhair	1 Modul 45 device + 1 data connection

	7368222	UDHOME-ONE GV D2	Spots	1 Modul 45 device + 1 data connection
	7368262	UDHOME2 GV D2	Spots	2 Modul 45 devices + 2 data connections
	7368223	UDHOME-ONE GV D3	Cross hatch	1 Modul 45 device + 1 data connection
	7368263	UDHOME2 GV D3	Cross hatch	2 Modul 45 devices + 2 data connections
	7368224	UDHOME-ONE GM D1	Marygold	1 Modul 45 device + 1 data connection
	7368264	UDHOME2 GM D1	Marygold	2 Modul 45 devices + 2 data connections
	7368225	UDHOME-ONE GM D2	Oriental	1 Modul 45 device + 1 data connection
	7368265	UDHOME2 GM D2	Oriental	2 Modul 45 devices + 2 data connections
	7368226	UDHOME-ONE GM D3	Hammer blow	1 Modul 45 device + 1 data connection
	7368266	UDHOME2 GM D3	Hammer blow	2 Modul 45 devices + 2 data connections

**All products listed above are delivered without devices. Please order sockets, data sockets, multimedia devices and other devices separately from our extensive Modul 45 range.*

Patented safety

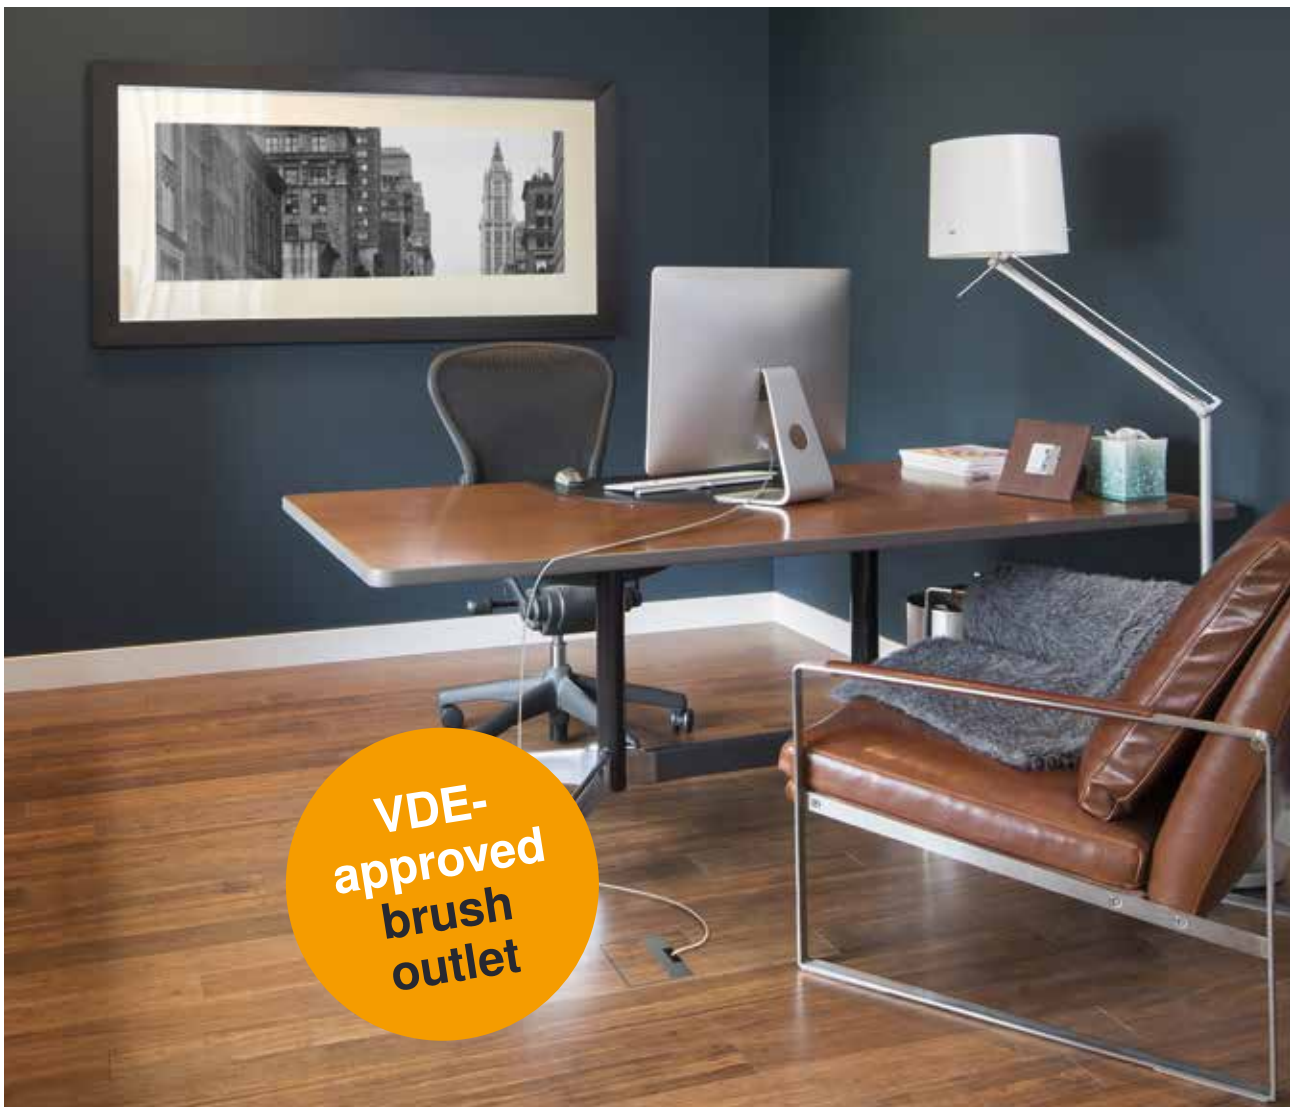

Even more variety: The UDHOME-ONE and UDHOME2 floor sockets are now also available as versions with a brush outlet – either with or without a floor covering recess in the cover. This version is certified and designed for use in the whole of Europe. Its specially brushed stainless steel finish impresses with its even appearance and it blends elegantly and discreetly into many different room concepts. The VDE-approved cord outlet opening can be simply closed when the floor sockets are not used. When in use, the cables are led out via the flush-to-the-floor brush strip. In addition, the patented brush strip has a clear and discreet design that blends flexibly and harmoniously into the existing interior thanks to the flat-laying opening lever. This means that you can ensure safe electrical installations in your projects, which also fulfil all your aesthetic and functional demands.

UDHOME cover with brush outlet and brushed stainless steel surface

Item number	Type	Design	Suitable for*
7368356	UDHOME-ONE BN	With brush outlet, decorative plate	1 Modul 45 device + 1 data connection
